

Careers in IT: The Real Story

Wednesday, April 21st, 2010

Bellevue College ~ Carlson Theater

Technology touches every job, career, and industry in today's society. Technology literacy is essential to succeed in today's employment marketplace. Find out about AND discover how to get started in a variety of careers including: **web design, video and film production, gaming, mobile and wireless, computer forensics, and health informatics.**

Understanding Information Technology doesn't mean **just programming!** It involves leadership skills, communication abilities, teamwork and a love for constant challenges!

We invite students, teachers, counselors, career specialists, and CTE Director's to attend this event and learn how important Information Technology is to their future!

THERE IS NO COST TO ATTEND! REGISTER TODAY!

<http://www.coeforict.org/events/careers/>

Encourage your students to learn about internships, salaries, and jobs that may be waiting for them! Hear from current students and recent graduates speak to how they have benefited from their technology degrees. You will have the opportunity to ask questions and interact with people -- like you -- who are just beginning their exciting careers in Information Technology!

Featuring a special keynote speaker from **Microsoft** and speakers from local leading companies PLUS a drawing for an **Xbox, Video Games**, and more!
